Base System Software - InstaGate

Version: ti-ESFT_REDPHISH-3.1-20060921

Download Size (EX/EX2): 48MB

Download Size (PRO/xSP): 40MB

Product Enhancement Summary

- **User Inboxes.** The display for each user's inbox now shows the folder name where each message resides.
- **Email Server.** A new optional feature provides duplicate checking for remote servers.

Changes to System Administration GUI

- **User Inboxes.** The display for each user's inbox now shows the folder name where each message resides.
- **Email Server.** A new optional feature provides duplicate checking for remote servers.
- **Japanese Localization.** Japanese localization has been updated for many new text strings.

Technical Support Issues Addressed

- **Email Server Trusted Relays.** Fixed issue where any configuration change that caused static routes to change would cause the email relay/server's allowed custom relay list to be re-written to the Automatic settings.
- **Email Relay Server.** Fixed issue with the building of "invalid" users list if users did not have email permissions.
- **Email Server.** Fixed issue with authentication for an incoming/outgoing server if the Password and Confirm Password fields did not match.
- **Email Server.** Retained InstaGate email server configuration option Forward to Internal Server for previous release compatibility.
- **Email Server (Mirrored/Multi-drop).** Messages for a mail server in mirrored or multi-drop mode and forwarding to an internal server will now be scanned for spam.

- **Email Server (Mirrored/Multi-drop)**. Mailbox messages to invalid users will be silently discarded instead of bounced.
- **Email Monitor**. All SMTP protocol variants are now reported properly.
- **Email Monitor**. Email monitor now works if SpamFilter is not installed.
- **Email Monitor**. Remote IP addresses now appear as special designation Local if the message was retrieved via multi-drop or mirrored mail.
- **Email Report**. Due to popular demand, the mailed email usage report is back.
- **POP3/IMAP**. Fixed issue where clients received errors if the maximum number of allowed processes for the POP3 and IMAP servers was exceeded.
- **System Logs**. It is now possible to view archived logs.
- **System**. Scheduled jobs were adjusted to run at their proper time.
- **System**. Fixed issue where port 8000 admin UI would start in addition to port 8001.
- **System Information (InstaGate only)**. Under System Information, a unit in Email Relay mode will now appear as Enabled.

Email Server - InstaGate

Version: esoft-snapin-email-1.0-20060919

Download Size: 1MB

Gateway Anti-Virus - InstaGate

Version: esoft-snapin-antivirus-1.0-20060922

Download Size: 12MB

Product Enhancement Summary

- **Anti-Virus Monitor**. A new Gateway Anti-Virus monitor has been added to show virus-specific traffic statistics.
- **Attachment & Stripping**. The Attachment Stripping and Notices management was re-written to ease attachment management and also includes a separate notification set for stripped attachments.

Changes to System Administration GUI

- **Japanese Localization**. Japanese localization has been updated for many new text strings.

Technical Support Issues Addressed

- **Email Monitor**. Email monitor now works if SpamFilter is not installed.
- **Email Relay Server**. Fixed issue with the building of "invalid" users list if users did not have email permissions.

Gateway Anti-Spyware - InstaGate

Version: esoft-snapin-gwspyware-1.0-20060921

Download Size: 14MB

Product Enhancement Summary

- **HTTP Proxy performance**. Fixed issue where very large files (over

30MB) would cause system to slow down.

Changes to System Administration GUI

- **Gateway Anti-Spyware/Gateway Anti-Virus.** On the Advanced Settings form, the Inbound SMTP and Outbound SMTP labels have been renamed. Local SMTP is for all locally processed email and Other SMTP is for non-local connections that do not connect to the local mail server.
- **Japanese Localization.** Japanese localization has been updated for many new text strings.

Technical Support Issues Addressed

- **HTTP Proxy performance.** Fixed issue where very large files (over 30MB) caused system to slow down.
